

Procurement Policy

Governs how goods and services are sourced, approved, and documented.

Document Owner	Head of Procurement	Version	3.0
Review Cycle	Every 12 months	Sensitivity	Internal
Authoritative Source	Yes	Status	Approved

Purpose & Scope

This policy applies to all employees who purchase, commit to, or approve the purchase of goods and services on behalf of the organisation. It exists to ensure value for money, fair supplier treatment, and a complete audit trail.

Required Documentation

Before any procurement approval can be granted, the requesting party must provide the following documentation. Incomplete submissions will be returned without approval.

- A completed purchase requisition with business justification.
- At least three competitive quotes for spend above \$25,000, or a documented single-source justification.
- A signed supplier NDA where confidential information will be shared.
- Evidence of supplier onboarding and due-diligence completion.
- The draft contract or statement of work for any commitment above \$25,000.
- Budget confirmation from the relevant Finance Business Partner.

Approval Process

Procurement approval follows the Contract & Spend Approval Matrix. Procurement Operations owns the approval workflow and is accountable for verifying that documentation is complete before routing a request to the required approver.

Policy Review Cycle

This Procurement Policy is reviewed at least once every 12 months, or sooner where there is a material change in regulation, delegation of authority, or business structure. The Head of Procurement is the accountable owner for scheduling and signing off each review.
